

SHUBHAM YADAV

DevOps & Cloud Engineer

Gurugram, Haryana, India • +91-9205560130 • shubham34343s@gmail.com • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience designing containerized, cloud-native systems on AWS and GCP using Kubernetes, Terraform, and GitOps-based CI/CD pipelines. Skilled in automating infrastructure provisioning with Infrastructure as Code, building observability stacks with Prometheus and Grafana, and deploying multi-tier applications through Docker and Jenkins-ArgoCD workflows. AWS Certified Cloud Practitioner and Oracle Cloud Infrastructure Certified DevOps Professional, focused on building reliable, automated, and scalable infrastructure.

TECHNICAL SKILLS

Cloud Platforms: AWS (EKS, EC2, VPC, IAM), Google Cloud Platform (GCP)

Containers & Orchestration: Docker, Docker Compose, Kubernetes, Minikube, Kind

CI/CD & GitOps: Jenkins, ArgoCD, CI/CD Pipeline Automation

Infrastructure as Code: Terraform (HCL), Ansible, Configuration Management

Monitoring & Observability: Prometheus, Grafana, Cluster & Application Monitoring

Networking & Web: VPC Design, Nginx (Reverse Proxy)

Languages & Scripting: Python, Bash

Tools: Git, GitHub, Linux

PROJECTS

Chittrbox — Real-Time Chat App on Kubernetes | *MERN Stack, Docker, Kubernetes, Jenkins, Nginx* [GitHub](#)

- Deployed a full-stack MERN real-time chat application (Socket.io messaging, JWT authentication) by containerizing the React frontend, Node.js/Express backend, and MongoDB database, then orchestrating them on Kubernetes.
- Built a Jenkins CI/CD pipeline to automate image builds and deployments, with Nginx handling reverse-proxy traffic routing across services.

Django Notes App — Containerized Full-Stack Deployment | *Django, React, Docker, Jenkins, Nginx* [GitHub](#)

- Built and containerized a full-stack Notes application with a Django REST backend and React frontend, packaging it with Docker for consistent, reproducible deployments.
- Configured Nginx as a reverse proxy in front of the application and authored a Jenkins pipeline to automate the build and deployment workflow.

DevSecOps Platform with Docker AI & Scout | *React, Go, PostgreSQL, Docker, Docker Scout, Kubernetes* [GitHub](#)

- Built a production-style full-stack DevSecOps project (React, Go, PostgreSQL) containerized with Docker Compose using multi-stage builds and Docker Hardened Images to reduce image size and attack surface.
- Analyzed and hardened container images using Docker Scout and Docker AI (Gordon), applying Kubernetes and CI/CD security practices throughout the pipeline.

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services
- Oracle Cloud Infrastructure 2025 Certified DevOps Professional — Oracle
- Python for Data Science — NPTEL

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

The NorthCap University, Gurugram, India

Bachelor of Computer Applications (BCA)

2021 – 2024

GD Goenka University
